About

HIMSS[®]

The Healthcare Information and Management Systems Society (HIMSS) is a comprehensive healthcare-stakeholder membership organisation exclusively focused on providing global leadership for the optimal use of information technology (IT) and management systems for the betterment of healthcare. Founded in 1961 with offices in Chicago, Washington D.C., Brussels, Singapore, and other locations across the United States, HIMSS represents more than 23,000 individual members, of which 73% work in patient care delivery settings. HIMSS also includes over 380 corporate members and nearly 30 not-for-profit organisations that share our mission of transforming healthcare through the effective use of information technology and management systems. HIMSS frames and leads healthcare public policy and industry practices through its educational, professional development, and advocacy initiatives designed to promote information and management systems' contributions to ensuring quality patient care.

HIMSS Mission

To lead healthcare transformation through the effective use of health information technology.
