

# EMR : THE JOURNEY TO THE NEXT GENERATION HEALTHCARE

## Are you Ready?

Asia Pacific EMR Adoption Model <sup>SM</sup>	
Stage	Short Description
Stage 7	Complete EMR; CCD transactions to share data; Data warehousing; Data continuity with ED, ambulatory, OP
Stage 6	Physician documentation (structured templates), full CDSS (variance & compliance), closed loop medication administration
Stage 5	Full complement of R-PACS displaces all film-based images
Stage 4	CPOE, Clinical Decision Support (clinical protocols)
Stage 3	Nursing/clinical documentation (flow sheets), CDSS (error checking), PACS available outside Radiology
Stage 2	Clinical Data Repository (CDR), Controlled Medical Vocabulary, CDS, may have Document Imaging; HIE capable
Stage 1	Ancillaries – Lab, Radiology, Pharmacy – All Installed
Stage 0	All Three Ancillaries (LIS, RIS, PHIS) Not Installed

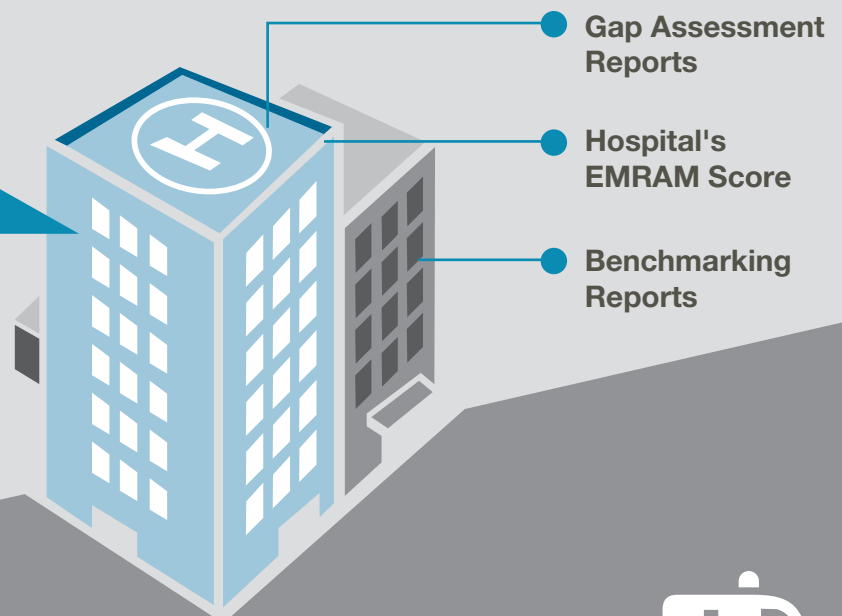

The Asia Pacific EMR Adoption Model (EMRAM) objectively measures hospitals' progress in creating a paperless patient record environment based on a generic, incremental approach. The EMRAM identifies and scores hospitals using an eight-step scale that charts the path to a fully paperless (stage 7) environment. HIMSS Analytics® has been collecting data and providing benchmarking reports to US hospitals since 2005 and is now available for the Asia Pacific markets.

Whether you are challenged with aligning IT initiatives with overall business strategy, delivering an expert plan for future development, or ensuring your organization is making the most appropriate use of funding, you can count on HIMSS Analytics® for guidance to inform and support your decisions.

## Extensive benefits package awaits hospitals who participate in the EMR Evaluation

"The HIMSS Analytics Asia Pacific EMR facilitates us in justifying our investment as there are documented benefits in terms of clinical outcomes and operational efficiency from the other hospitals who have achieved the various levels of adoption."

- SingHealth, Singapore

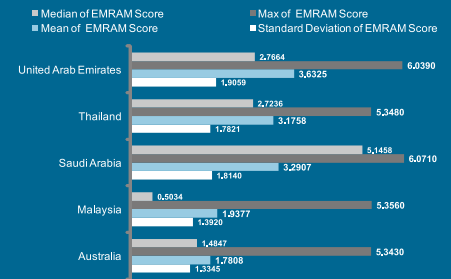

# BENCHMARKING REPORTS

## Get the insight you need to realize your vision.

As an Annual Study participant, you will receive exclusive access to market intelligence that allows you to check your progress and compare your organization to a peer group of your selection.

With information input by healthcare industry participants in Asia Pacific, the HIMSS Analytics® Database is your source for the most detailed snapshot of the state of healthcare IT today as well as a projection of what's to come.

### Sample Segments Comparison Data

### 40+ Hospital-Level Benchmarking Reports

- Compare your EMRAM score to similar hospitals or the average score of specific countries and regions
- Compare your organization to similar providers relative to hospital types, bed size and operating expense
- Pull intelligence to support IT resource planning and reinforce conversations on change and progress with stakeholders; support initiatives; drive priorities and help to determine "what's next"
- Customized reports for national or regional healthcare organizations based on national or regional objectives

**"The benchmarking reports are very useful for our strategic planning and goal-setting. They help us to identify the gaps and define our working goals and direction."**

- President, Chang An Hospital, P.R. China

## Planning for the development of your future starts today!

### Consulting Service

Be empowered and supported by our independent consultants in the selection, adoption and productive use of health IT technologies. Gain advice on best-practices and hands-on assistance to realize hospital operational efficiencies and improve quality of care through our maturity models (EMRAM).

### Training Service

Gain expertise, insights and comprehensive knowledge on health informatics and apply them in real-world settings to improve quality of care and operational efficiency in your healthcare facility.
